OBJECTIVE

To obtain a full-time position that allows me to develop to my fullest capacity as a designer in all regards; to join a team in which a symbiotic relationship can be established, where my skill set could both be utilized in full and grown to extents previously only imagined.

I'm looking for a fit that allows me to grow in the directions my passions have taken me, to a point of specialization. I hope to work across various mediums that I already have experience in while gaining knowledge and understanding in other areas to advance my career.

SKILLS

I have a lot of experience with 2D and 3D still and motion graphics, as well as using my hands to build, craft and model. I have also spent many hours playing music.
